Roman Prigodskii

Moscow, Russia • roman@prigodskii.dev • **prigodskii.dev** • github.com/romanprigodskii

Education

Letovo School Moscow, Russia | Expected Jun 2027
Grade 11 (final year), advanced (profile) mathematics track • SAT Mathematics 790 (Aug 2026) • IELTS 7.0

Honours

Moscow Olympiad in Economics – Ranked 1st of 201 finalists in Grade 10 2025/26
All-Russian Olympiad in Economics – National finalist, two consecutive years 2025, 2026
RANEPA Olympiad in Economics – Final-round prize-winner, Grade 10 2025, 2026
International Mathematical Modeling Challenge (IM²C) – Commendation, 7th place in the Russian national round 2026
All-Russian Olympiad in Mathematics – Regional-round prize-winner (Moscow), Grade 9 2024/25
Leonhard Euler Mathematical Olympiad – Regional-round prize-winner, Grade 8 2023/24
Letovo School – Best MYP Personal Project in Mathematics Mar 2025

Research (papers at prigodskii.dev/research)

An e-value audit of a deployed forecaster – sole author **Accepted at two NeurIPS 2026 workshops | Sep 2026**
- An e-value audit of **84 pre-registered market-efficiency hypotheses** about a deployed UFC forecaster; posters at **New in ML** and **E-Values: From Statistics to ML**, both non-archival.

Measure the instrument first – sole author **Working paper | 2026**
- Detection floors: the smallest effect an evaluation could have detected, measured with a null lever, the same recipe refit under a new seed.

Vertex Boxing – Vertex MMA's models ported to professional boxing **Open-source research | Jul–Sep 2026**
- Tested on **413,279 bouts** whether regional and club boxing is priced less efficiently: where priced, it is not. Blended into the opening price, the model passed a pre-registered backtest at $e = 41.8$ against a bar of 20 (2026 holdout).

Experience

Gluline (Apri Software L.L.C-FZ) – Co-Founder, Engineer and Head of AI UAE, remote | 2026–Present
- Co-founded the company behind **Gluline**, a messenger released on the **App Store** on 19 August 2026, then on **Google Play** and the web, in ten languages: Android, iOS, web and a Python backend in one repository.
- As Head of AI, responsible for everything the product does with a model, its assistant included.

Alfa-Bank – Intern Moscow | Jun 2026
- Built **Alfa-Romeo**, a working concept of the bank of 2035: a SwiftUI app on a NestJS and Postgres backend, with a Claude copilot that drafts each action and waits for a yes.

Zacks Rank stock-recommendation system – commissioned by a private investor Remote | Jul 2026–present
- Archives Zacks' full ranked screen (about 4,400 stocks) each weekday in a SHA-256 hash chain and issues daily buy and sell recommendations; nothing goes to a broker.

Projects (more at prigodskii.dev)

Vertex MMA – UFC analytics platform, vertexmma.com **Next.js, Python, LightGBM | 2026–Present**
- A nine-model forecasting stack (**LightGBM, CatBoost**, logistic regression and a 10,000-run Monte Carlo simulator) over 4,581 fighters and 8,906 bouts, in English and Russian.
- **AUC 0.7244** on 664 bouts held out from January 2025, measured against the market's closing price, which stays ahead: the model is better calibrated and less sharp.

indelible – open-source self-study tutor for Claude Code **Python | Sep 2026**
- Plans back from the learner's date, re-tests every skill cold two days later and brings each miss back on a spaced schedule. **17,743 lines** of standard-library Python, **588 tests**, **600+ downloads**.

Clipwell – native clipboard history for macOS and Windows **Swift, C# | Jun 2026**
- Written natively twice (SwiftUI, WPF) rather than once in Electron; MIT licensed, no account and no network calls.

Skills

Statistics: e-values and test martingales, anytime-valid inference, walk-forward validation, calibration, power analysis
Modelling: Python, LightGBM, CatBoost, scikit-learn, NumPy, pandas, statsmodels, Monte Carlo simulation
Engineering: TypeScript, React, Next.js, Postgres; Swift, Kotlin, C#; FastAPI, NestJS, Docker, Linux; LaTeX
Languages: Russian (native), English (working)
