

Roman Prigodskii

Moscow, Russia • roman@prigodskii.dev • prigodskii.dev • github.com/romanprigodskii

Education

Letovo School

Moscow, Russia | Expected Jun 2027

Grade 11 (final year), advanced (profile) mathematics track • SAT Mathematics 790 (Aug 2026) • IELTS 7.0

Honours

Moscow Olympiad in Economics – winner, 1st place by score in the Grade 10 division	2025/26
All-Russian Olympiad in Economics – national finalist in Grades 9 and 10	2025, 2026
Russian Presidential Academy (RANEPA) Olympiad in Economics – prize-winner, final stage	2025/26
International Mathematical Modeling Challenge (IM ² C) – commendation, 7th place in Russia	2026
All-Russian Olympiad in Mathematics – prize-winner of the regional stage, Grade 9	2024/25
Euler Olympiad – its analogue for Grade 8: prize-winner of the regional stage	2023/24
Letovo School – best MYP personal project in Mathematics, on the Collatz conjecture (published 2025)	Mar 2025

Research (papers at prigodskii.dev/research)

Testing by betting when the bets are real – sole author **Accepted, two NeurIPS 2026 workshops | Sep 2026**

- An e-value audit of **84 pre-registered hypotheses** about a deployed UFC forecaster, bet at a bookmaker's posted prices. Poster at **New in ML** and, in a shorter version, **E-Values: From Statistics to ML**, both non-archival.

Measure the instrument first – sole author **Working paper | 2026**

- Detection floors: the smallest effect an evaluation could have detected, measured by refitting under a new seed.

Vertex Boxing – the Vertex MMA models moved to professional boxing **Public report | Jul–Sep 2026**

- Tested on **413,279 bouts** whether regional and club betting lines are soft: where priced, they are not. Blended into the opening price, the model passed a pre-registered backtest at $e = 41.8$ against a bar of 20 (2026 holdout).

Experience

Apri Software L.L.C-FZ – Co-Founder, Engineer and Head of AI UAE, remote | 2026–Present

- Co-founded the company behind **Guline**, a messenger released on the **App Store** on 19 August 2026, then on **Google Play** and the web, in ten languages: Android, iOS, web and a Python backend in one repository.
- As Head of AI, responsible for everything the product does with a model, its assistant included.

Alfa-Bank – Intern 2026

- Built **Alfa-Romeo**, a working concept of the bank of 2035: 93 iOS screens in SwiftUI on a NestJS and Postgres backend, live rates from the Bank of Russia and CoinGecko, and a Claude copilot that drafts each action and waits for a yes.

Zacks to Interactive Brokers pipeline – paid client work Remote | Jul 2026

- Turns each day's Zacks screen (4,369 stocks on one day) into an equal-weight book of 25 positions and the orders that close the gap at Interactive Brokers; a dry run so far.

SPIEF Junior – delegate, St Petersburg International Economic Forum St Petersburg, Russia | Jun 2025

Projects (more at prigodskii.dev)

Vertex MMA – UFC analytics platform, vertexmma.com **Next.js, Python, LightGBM | 2026–Present**

- A nine-model forecasting stack (**LightGBM**, **CatBoost**, logistic regression and a 10,000-run Monte Carlo simulator) over 4,581 fighters and 8,906 bouts, in English and Russian.
- **AUC 0.7244** on 664 bouts held out from January 2025, graded against the bookmaker's closing line, which stays ahead: the model is better calibrated and less sharp.

indelible – open-source self-study tutor for Claude Code **Python | Sep 2026**

- Plans back from the learner's date, re-tests every skill cold two days later and brings each miss back on a spaced schedule. **17,743 lines** of standard-library Python, **588 tests**.

Clipwell – native clipboard history for macOS and Windows **Swift, C# | Jun 2026**

- Written natively twice (SwiftUI, WPF) rather than once in Electron; MIT licensed, no account and no network calls.

Skills

Statistics: e-values and test martingales, anytime-valid inference, walk-forward validation, calibration, power analysis

Modelling: Python, LightGBM, CatBoost, scikit-learn, NumPy, pandas, statsmodels, Monte Carlo simulation

Engineering: TypeScript, React, Next.js, Postgres; Swift, Kotlin, C#; FastAPI, NestJS, Docker, Linux; $\text{\LaTeX}$

Languages: Russian (native), English (working)
